Education & Projects

University of Porto, Faculty of Sciences

BSc in Chemistry (2018 - 2020 DNF)

Online course by coursera

Web Development & Coding, University of Michigan.

Pokédex Project

A responsive app where the user can search for all the existing pokemons and catch 'em all! Test it out here: pokedex-cstrecht.vercel.app/

Rick and Morty Wiki Project

A responsive app (mobile and desktop) for the Rick and Morty fans. Give it a try here:

rick-and-morty-wiki-cstrecht.vercel.app/

Skills

- HTML, CSS & JavaScript
- React JS
- Deployment services (Vercel, Netlify, Heroku...)
- Styled Components & Tailwind CSS
- Visual Studio Code, Git & Bash
- Github, Notion, Figma & Jira

Work Experience

Intern Frontend Developer, YariLabs

Braga / remote (Apr - Oct 2022)

- Improved UI and responsiveness of apps built in Ruby (*RoR Action Views*) using Tailwind CSS;
- Collaborated on a blockchain-based project with cryptographic tokens distributed based on performance analysis (mydharma.network);
- Teamwork using Github for versioning and code reviews, Jira for sprint planning, and Figma for UX/UI design.
- Worked closely with clients to meet their goals and needs

Currently...

At the end of my internship, I decided I wanted to learn more about React and now I am developing projects to practice my skills. Some of them are already public on my [Github](#), and others are still in the oven. I am practicing my skills in **REST APIs**, **React JS**, **React Query**, **TypeScript** and **Next.js**.
